It is easy to understand the existence of autocracies and dictators 50 or 100 years ago, at a time when a contrary voice echoed just a few meters away and reached few, and yet, the face had to be given to receive the fury of authoritarian dictators. But today, in the year 2024, it is not possible to understand how dictators manage to subjugate a population in which they have the voice, the word and who, when they dominate it, reach thousands and even millions of people.

As a result of technological advances and more specifically, in the dissemination of means of communication based on telecommunications, the human being today with a cell phone humiliates any large centralized newspaper editorial office, we see several elements that with almost no resources but with a lot of knowledge can achieve convey an idea of freedom, hope and peace. This bothers, it bothers not only the large journalistic groups but also the government structure itself, as it was easy to corrupt some broadcasters, as we saw at the time of the Brazilian military dictatorship, when Rede Globo acted in favor of the military, which was responsible for the deaths of thousands of Brazilians. , a fateful story that is once again emerging on the horizon and in a frightening way, with the same broadcaster fighting in favor of the new authoritarianism and the new Brazilian dictatorship.

As? This is the question. The Brazilian government is divided into three powers and is done this way so that a being endowed with supreme arrogance does not take the reins of the country for himself and thus establish a dictatorship. The defense mechanism didn't work, and it's clear. I wouldn't like to give this answer, but I can't help but give it. Basically, a being took on a high position in the Brazilian justice system, and with associates in various sectors managed to denigrate the normal rites of Brazilian law, forging evidence, acting outside the law, coercing people to give false statements, and even actions so terrible that not even the author of this text is capable of imagining. All this can be proven today and will be in this document.

How can someone involved with large organized crime cartels in Brazil, such as the PCC[1] and large political parties, take a seat on the highest court of justice in a country? Everything went wrong for Brazilians and everything that could not happen happened and today we have the biggest dictatorship ever implemented in Brazil, a dictatorship that arrests foreign journalists, that arrests company employees, that takes down the accounts of political opponents and pages of those who criticize them, and I wish it were just that, but the list of inhumane actions is huge and will be described in this document.

A demonstration of gratitude policy or commitments what
compromise the independence of our Constitutional Court. (Alexandre de
Moraes)

In the beginning everything was happy

Alexandre de Moraes is a Brazilian born in 1968 and currently serves as Minister of the STF. But his career intertwines politics and technique, after all, being a Minister is a technical position not elected by the people. He graduated from the University of São Paulo (USP) in 1990 and it is from this same university that he holds a Doctorate degree (in addition to his training), this title came in 2000. The topic of Alexandre de Moraes' thesis was: Constitutional jurisdiction and constitutional courts - supreme guarantee of the Constitution.

Still at USP, in 2001 he gained the right to free teaching with the thesis: General theory of administrative constitutional law - constitutional profile of public administration. This thesis was the basis for the book Administrative Constitutional Law by Atlas.

Until then, he was more of a Brazilian who acted, evolved and seemed to be a normal being, perhaps this is a characteristic of a psychopath. Look at photos of a seemingly normal person.

Acting as a prosecutor in 1997

A normal being after 2001

But whenever we have political aspirations associated with a hint of psychopathy, we have a dictator, and his climb to power will transform this person who even smiles from time to time into a maniacal psychopath and dictator of a great nation, who unlike his own hymn, overslept on the placid banks.

He also participated as the author of a legal best-seller in 2002 entitled *Direito Constitucional* by Atlas (first edition only). This qualified him to take up a teaching position in 2002 at USP, and in 2014, for political reasons, he stopped being a permanent professor to become an associate professor. He is also a professor at Universidade Presbiteriana Mackenzie.

Until then, Alexandre de Moraes was the seventh most cited constitutionalist until 2012, being a reference in terms of democracy and the operation of law as a fundamental piece for good public service.

Although it is a technical text, I couldn't intervene with my thoughts, but I can't, until then Alexandre de Moraes is a normal guy, but politics ruins everything, we can see in the case of this individual. From 1991 to 2002 Alexandre was a Public Prosecutor at the Public Ministry of the State of São Paulo (MP-SP) with whom he has always maintained a close relationship, until the present day. It is natural that in such a position you will have contact with politicians and the orange begins to rot at this point.

Political aspiration and point of inversion of values

It all starts when in 2015 Alexandre de Moraes interferes in an investigation carried out by the Federal Police against Alexandre Victor de Carvalho. This investigation was authorized by the Superior Court of Justice. The telephone conversation between the Alexandres can be obtained in this reference: First misdemeanor of Moraes[2].

The full transcript can be found in the list below.

Secretary: Public Security, Carla, good afternoon! Alexandre Victor de Carvalho: Good afternoon, Carla. The speaker is here from Belo Horizonte. It's judge Alexandre de Carvalho. I want to speak to secretary Alexandre de Moraes... he called me

Secretary: Yes, yes. Just a moment, I'll pass by

Carvalho: Thank you

Alexandre de Moraes: Hello! Carvalho: Hi, Alexandre, how are you, my friend? Moraes: Oops! All is well?

Carvalho: How are you? How is the fight there? Moraes: Here we are, between one beating and another, we are surviving. I like animation. And you, how are you?

Carvalho: Thank God everything is fine Moraes: Your Atlético didn't even bother with the joker... Carvalho: You couldn't handle it, right? Laughter

Carvalho: Here, will the writ of mandamus be judged on Tuesday?

Moraes: That's it, it's Tuesday, you can rest assured, okay?

Carvalho: Yeah? Moraes: I had it last week, I even said it was taking a while, I ended up meeting Toffoli and today I met with him here in São Paulo, there was a meeting of the presidents and inspectors of all TRE's with him.

Carvalho: I know. Moraes: I was invited to give a talk early in the morning, I had a chat with him, so there won't be any news. Carvalho: Right.

Moraes: I don't think there will be any problem, for the release I also redistributed memorials, I asked people to redistribute them and Gilmar is coming here tonight for this meeting too. Then, I exchange an idea with him. But he told me no... You know that judge's mind, that crazy head of yours, right? But it's good to get it out of the way, I want to start campaigning for you for the STJ, man!

Carvalho: Yeah, I have to get this out of my sight, I have to. Moraes: You have to get it out of the way, otherwise these people will start to bother you, right? Carvalho: yes, exactly, but you can't be there, right, or will you be?

Moraes: No, I can't, I'm licensed, I'll ask to provide support, okay? Carvalho: Right.

Moraes: Just to focus on the most important points. In fact, Toffoli released it. Today is the agenda. Let's see if it will come in or will come in the next week.

Carvalho: I know. Moraes: But I already pointed out what is most important to talk about in terms of support. You have to come up with just one idea. You know that if you start a lot in support, no one listens. Carvalho: Okay.

Moraes: The issue of deadline, such, such and such. Carvalho: How is it there? (...) During this period of Fátima, do you know how the thesis was reinforced?

Moraes: Nothing, nothing, I don't think she even knows that this exists.

Carvalho: You didn't understand what I said, our legal thesis, the deadline that cannot have two.

Moraes: There haven't been any other cases like this, ours was the absurdity of absurdity, right? Carvalho: Absurdity of absurdity.

Moraes: The bullshit of the bullshit, from that weakling Gilberto, right?

Carvalho: who will support us there?

Moraes: Dr. Laerte, who is a retired judge here in São Paulo, of public law and such. Calm down, he can be calm.

Carvalho: Let me ask you a question: what class is it? Moraes: I don't understand.

Carvalho: What group is it?

Moraes: It changed, right?

Carvalho: It changed. Moraes: The class changed... it's something to be analyzed, because the whole natural judge changes. Carvalho: Funny.

Moraes: The guy changes, he changes all the other four. Carvalho: Here in the court it doesn't change at all, in fact, as in all Brazilian courts, the person who removes the report passes on to the subsequent one.

Moraes: Yes, and you take the collection from the position you removed from. Carvalho: Of course.

Moraes: At the Supreme Court, no, the guy goes, takes his own collection, but the natural judge changes.

Carvalho: Change the natural judge. Moraes: For you to see, it's just that these changes don't happen very often, the guy who is the rapporteur of very important cases, only knows that in this group he is defeated: he asks for change. Carvalho: And it's Toffoli, Gilmar.

Moraes: It should be included because Toffoli is president of the class, if he approved it, he will decide, right?

Carvalho: Yes. Moraes: It's Toffoli, Gilmar, who I'm going to talk to, Celso, Cármén and Teori. Carvalho: Teori is a career judge, Cármén Lúcia knows us here.

Moraes: So, Cármén is from there, right, man? Carvalho: It's from here, you know us here, you know my story here, right? Moraes: If you have someone to just remember her, it's not bad. Carvalho: Yeah, I'll try to see if I can find a friend of mine here.

Moraes: These things are always... Carvalho: It's always good, it's always good.

Moraes: Let's not fool around at the end, right? Carvalho: Exactly, but what do you think, you've been with everyone, Teori, with her...?

Moraes: Yes, although it isn't, I'm going to ask, he's going to be at the presidents' dinner today, I'm going to ask Lewandowski to remember them too, because, remember, it's Lewandowski who gave you the injunction.

Carvalho: Yes, the injunction is his. Moraes: I told you: calm down, we have to wait for Joaquim to go on vacation, otherwise we're screwed.

Carvalho: I remember.

Moraes: Then, on January 15th, Lewandowski took over, I went there on the 16th and, in the decision itself, he already kills, right? So I'm going to, very politely, see if he doesn't mind touching it.

Carvalho: That's great. Moraes: Okay? Carvalho: Great. Moraes: Let's talk.

Carvalho: Let's talk, let's hope, but let's put it like this: you're on the right track, right?

Moraes: Ah, yes, I think you'll finally get this rubbish out of your way, this hassle, because it's a pain in the ass.

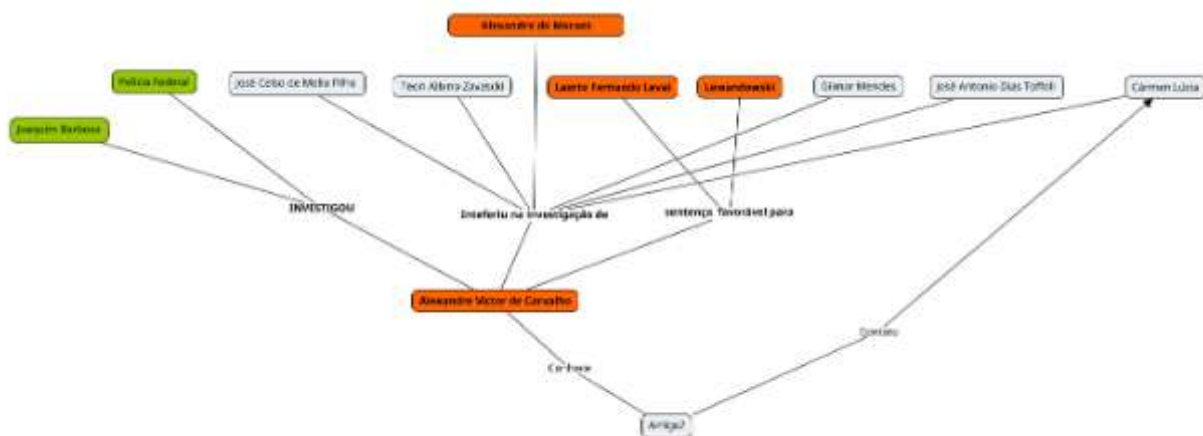

Carvalho: Terrible. Moraes: Okay?

Carvalho: Okay, my dear. Moraes:

Let's talk, hugs! Carvalho: I await your news, hugs! Moraes: Okay!

This audio demonstrates everything that is Brazil and the entire great government scheme, a chain of influences that helps some people who are friends of certain people, in other words, whoever is a friend of the REI will never be investigated and punished. But again he ended up interfering in the technical text, including my observation.

In the diagram below, we will detail the list of people in orange, they are the people who acted directly in the sentence and indirectly those in blue. It is clear that it is a chain of influence in which the higher the position, the more they are called upon when it is necessary to interfere in favor of organized crime.

Joaquim Barbosa and the Federal Police in this case are against the person under investigation who needs to get rid of the investigation. Every investigation initiated by the Federal Police comes after a request from, probably, Joaquim Barbosa or the Federal Public Ministry. This interference is enough for an arrest.

The Federal Police operation is Operation Abside, which investigates crimes conducted by judges at the TJ of Minas Gerais and which is being processed at the Superior Court of Justice. In addition to corruption, several practices occurred in exchange for political favors and at the center was Alexandre Carvalho, who also employed ghost family members in public positions. Alexandre de Moraes exerted influence along with the government of Geraldo Alckmin (PSDB), this gave the then Alexandre de Moraes prestige among politicians who saw in him someone they could count on to circumvent the country's laws. That was the turning point.

Alexandre de Moraes' relationship with political parties

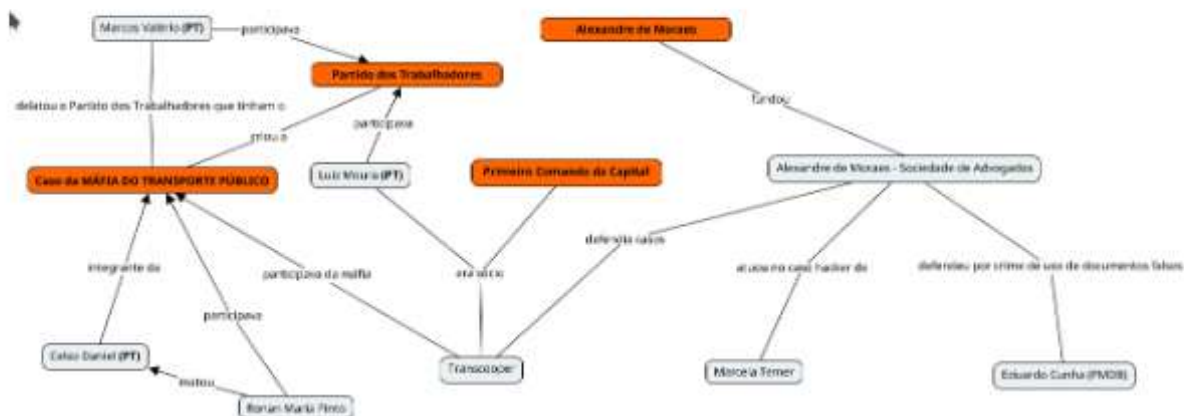

Alexandre de Moraes' role in the Abside case earned him notoriety among politicians during the following years, and especially in the PSDB, which was waging a false fight against the left led by the PT, this false fight is known in Brazil as "Teatro das Tesouras"

Alexandre de Moraes was appointed by then President Luiz Inácio Lula da Silva in 2005 to join the composition of the National Council of Justice, even though he was associated with the PSDB, a PT president appointed him. In 2007, under the administration of Mayor Gilberto Kassab, he began his work as Municipal Secretary of Transport in the city of São Paulo, his work was carried out in this department until 2010.

In 2010 Alexandre de Moraes realized that it was possible to obtain money from his prestige, but to do so he would need to start a law firm and take on political cases, after all he already had experience in circumventing the law, with an intricate network of favors and political support. One of the cases discussed was the case of Eduardo Cunha from the PMDB party, who used false documents in political proceedings.

While maintaining his Law firm specializing in serving Politicians, he was appointed in 2014 by Geraldo Alckmin (PSDB) to the position at the Public Security Secretariat of the State of São Paulo and served for 2 years. The funny thing is that it was strongly in favor of violence against demonstrations[4], in 2014, 2015 and 2016 we had many popular demonstrations in Brazil and in 2016 we had the peak, culminating in the fall of Dilma Rousseff.

In 2015, an article would have opened a new investigation against a scheme formed by politicians and organized crime[5], although it seems redundant when talking about politicians and organized crime, for many politicians are good people and do no harm. At the São Paulo Court of Justice there were 123 cases in 2015 in which Alexandre de Moraes was a lawyer for a cooperative called Transcooper. It turns out that this company belonged to Primeiro Comando da Capital (PCC), so there was a relationship between Alexandre de Moraes and the PCC in the Transcooper cases.

Among the members we have former deputy Luiz Moura (PT), Luiz Moura was the liaison between the organized group (PCC) and the cooperative, he was caught in a meeting with 13 members of the PCC, this operation was carried out by the State Department of Criminal Investigation (Deic), the following references were found that attest to this involvement [9] and [10]. But Alexandre de Moraes lied when requesting the censorship of the media that indirectly linked him to the First Command of the Capital, according to this order [8].

The issue of public transport in Brazil has always been related to crime and murderous organizations. Years before Alexandre de Moraes took over as transport secretary, there was a group of members of the PT, who at the time was a mayor. Daniel would have been killed because he had a disagreement with the gang that extorted resources from bus companies hired by the city of Santo André and led by Ronan Maria Pinto.

According to testimony by Marcos Valério (PT), the PT and the PCC had a scheme in the area of transport, according to Valério Ronan Maria Pinto was blackmailing, according to an article in Revista Oeste, PT's president Luiz Inácio Lula da Silva. But where Alexandre de Moraes comes in, he comes in 2022 because he is the one who prohibits in national territory the PT from being associated with the case of the death of Celso Daniel (PT) by the First Command of the Capital (PCC), in other words, trying to hide something with censorship. Ronan was released by the STJ in 2017 (November), knowing that Alexandre de Moraes entered the STF in 2017 (February).

Alexandre de Moraes becomes Minister of the Superior Federal Court

Before starting this topic, I want to make it clear that the investigation carried out has confirmed that Alexandre de Moraes' rise to the STF was not about his performance in the Hacker case that extorted the former first lady of Brazil Marcela Temer¹. Marcela Temer, 46 years younger than her husband, seems to have not been so sexually satisfied and ended up doing what she shouldn't do, and even took photos and recorded them. This paragraph, besides being a mockery, also establishes the point of view that every corrupt criminal ends up getting ahead in life in Brazil, and it couldn't be any different with Alexandre de Moraes.

¹This statement contradicts all newspapers and magazines (full stop).

Another unexpected death in Brazil, and worse, another from a plane crash. The accident of the Beechcraft King Air prefix PR-SOM occurred on January 19, 2017. Among the passengers who died in the crash was Federal Supreme Court minister Teori Zavascki, then rapporteur of Operation Lava Jato at the STF, and businessman Carlos Alberto Filgueiras, owner of the Emiliano hotels.

Given such a lack of scruples, it is natural that Alexandre de Moraes' name was on the list to assume such a position, and on February 6, 2017, Alexandre de Moraes was nominated by Michel Temer for the position of minister of the Federal Supreme Court.

Despite being opposed, which alleges that the aforementioned Alexandre de Moraes is linked to political parties and that a minister position is a technical and therefore non-political position, Moraes was approved as minister on February 21, 2017. He was not only questioned by senators and politicians, was also questioned by the population itself through the citizenship portal.

But what's the problem with a politician being a minister, the reason is simple, the scales of justice can become unbalanced and end up committing injustices due to the political and ideological bias of a political party, and we see what happened in the last elections. Yes, what I feared happened.

Controversial performance

Acting as minister of the STF, Alexandre de Moraes maintained his operating mode of illegalities, through political connivances and exchange of favors. Alexandre de Moraes made the STF rotten (more than it already was). Corrupting the last ministers who were coherent, as is the case of Carmem Lúcia who approved censorship in 2022 and institutionalized it in her famous phrase: "I don't agree with censorship, but I approve censorship until the 31st". It's a shame that it didn't specify either the month or the year. Today they suffer from a strong dictatorship completely focused on the control and censorship of the media.

Alexandre de Moraes' most notable performances are:

- Lava Jato;
- Presidency of the TSE and interference in elections;
- Rome Airport;

- Temporary shutdown of WhatsApp and Telegram and definitive shutdown of Twitter.

Operation in Lava Jato During the governments of Luiz Inácio Lula da Silva and Dilma there was an institutionalization of corruption, there were several cases of corruption involving everything from allowances for parliamentarians who voted in the interests of Luiz Inácio Lula da Silva and Dilma to a generous expropriation of resources of Brazilian state-owned companies, including Petrobras and the postal service. Corruption reached a level never seen before, so much so that it was exported to Bolivia, Venezuela and other countries in both Latin America and Africa. It was a period in which the patterns of corruption changed, from something illegal to something legal and acceptable, including by the population.

Still during Dilma's government, a political group carried out a series of investigations and leveraged one in particular, the operation came to be called Lava Jato. Although the interest was political, it was important for the country, and this investigation exposed the largest corruption scheme at an international level, thus demonstrating that there is a communist organization larger than the government's own. These meetings between Latin American countries became known as the São Paulo Forum (FSP).

The Lava Jato operation was also responsible for the only seizures of corrupt politicians and businessmen and naturally was responsible for the only arrest of a former president, Lula was arrested[7] on April 7, 2018 as a result of this operation, the arrest of then former president was tried according to Brazilian law in three instances and was convicted in all three instances and in each instance his sentence increases, showing that the Lava Jato judges responsible for the first instance did not apply the appropriate amount of time to Lula's crimes. Lula was even condemned in the third instance by a plenary of the STF in April 2019.

In green we have the three instances judging and convicting the criminal Luiz Inácio Lula da Silva, with hundreds of pieces of evidence obtained in an investigation that lasted years into the biggest corruption scheme ever seen and in a measure to stop the justice that was beginning to be done, the real justice, the STF unfairly manipulating the law as it wants, canceled everything.

The image above is from 2016, between 2014 and 2016 demonstrations like this were common and this is still considered small, without political party flags (as shown in the photo) people took to the streets against the corruption that was plaguing Brazil, for more than a decade the country experienced the largest corruption scheme ever recorded, including international repercussions. The opinion of the editors of this text is that there is a large international gang formed by influential left-wing politicians operating throughout Latin America. But it is logical that Alexandre de Moraes is not in favor of the people, much less of what is right, according to his own description[11].

During the investigation process in Operation Lava Jato, there was an exchange of information between investigators and judges about the progress and how to proceed. In Brazil this cannot happen according to Brazilian law and this can be seen as impartiality and naturally Judge Sérgio Moro was in these messages, everything the STF needed to invalidate.

Temporary shutdown of WhatsApp and Telegram In 2016, in a request from a party, it was guaranteed that no messaging application that works with end-to-end encryption would be blocked due to the failure to deliver a private message, as the services technically cannot do the decryption, that is, a technical issue. In 2020, Minister Edson Fachin defended such a ban and reinforced that no judge or member of the Judiciary blocks the application, nationwide, if private messages are not provided. In these cases, the government has the prerogative to break the confidentiality of communications. During the trial that took place in days, Alexandre de Moraes, endowed with his dictatorial arrogance, disagreed with his other colleagues and stopped the trial process, stopping the process that guarantees privacy through end-to-end encryption.

The blockade began in April when Alexandre de Moraes received harsh criticism from part of the population, due to his partisan and ideological tendency, related to the PSDB and exacerbated communism.

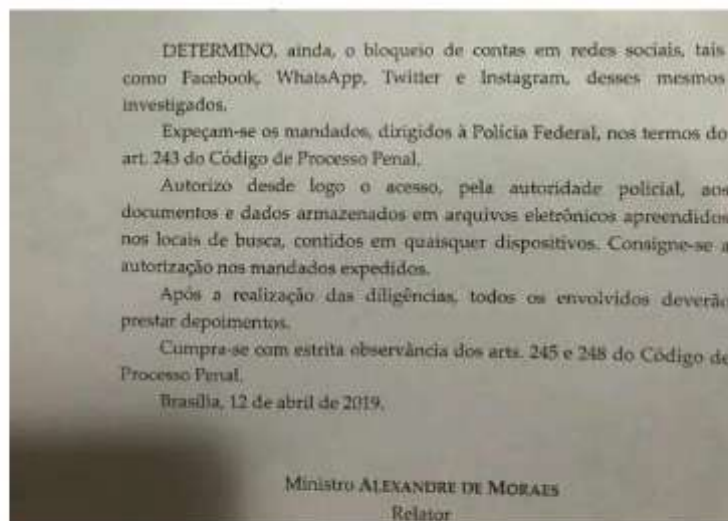

To get an idea of the message that was the root of Alexandre de Moraes' anger, it was:

THE our STF and Bolivarian, all aligned with you drug traffickers and corrupt people in the country. (critic by Alexandre de Moraes)

But if the reader has reached this point, Alexandre de Moraes' relationship with the First Command of the Capital and the Workers' Party, which is one of the supporters of communist governments in Latin America, has already been proven, that is, the censored sentence is the truth. The question is the truth, and see in the photo below a Minister of the STF who supports communism, and he is even openly communist in his networks. The criticism made is correct about the STF.

In the Figure below, the rapporteur Alexandre de Moraes proves that in addition to this he also performs the function of complainant and judge in this same action, in any serious court such overload of function in a case constitutes a conflict of interests and naturally expunges the judge from the case, this conflict of power can even be seen as a crime and even elevate it to malfeasance.

Due to the inability to open private messages, the order ended up shutting down the Whatsapp platform for a few hours, even though it was expressly prohibited due to the Internet civil law[13].

Another insanity from the STF, in the IT area today a large number of professionals work

in a decentralized way and that is why some decisions are affected in terms of time, depending on a certain procedure, people must be contacted outside their work time zone. Modern companies with Telegram operate decentralized, and naturally removing an account or message takes time to execute, in addition to technical problems, such as caching and distributed processing. In a fit of insanity, Minister Alexandre de Moraes of the STF gave the Telegram app a deadline of 1 hour^[14] to delete messages that were contrary to his thoughts, that is, if Alexandre doesn't like it, he orders them to be removed. Using a technical view, I believe that one of the two alternatives below is Alexandre's true aspiration in this case:

- Prove that you are a being who does not understand anything about Information Technology;
- Applying such an impossible deadline, which will justify removing the Telegram application from Brazil;

In case of non-compliance, the company's activities will be suspended for a period of 72 hours, with a fine of R\$500,000 per hour. The company's representatives in Brazil must be interviewed by the Federal Police within 48 hours. Alexandre de Moraes learned that by setting such high fines he would end up destroying people and companies, and that would be worse than prison in his view. So thinks a monster who, after 20 years immersed in a political environment, proved to be the most evil dictator ever seen. In the end^[15] Minister Alexandre de Moraes imposed a fine of 1.2 million reais on Telegram, shaking the credibility of the Brazilian state in the view of messaging applications. Who is crazy about investing in Brazil?

Presidency of the TSE and Interference in elections In Brazil, the Superior Electoral Court (TSE) is the body that organizes and governs the electoral process, which is a democratic process, and which is formed by the STF. The lack of independence of the TSE means that decisions on how to react to the electoral process merge with justice, generating distortions when a STF minister who is part of the TSE has political aspirations and ideologies. Minister Alexandre de Moraes was chosen as president of the TSE on June 14, 2022 and took office in August 2022.

From this moment on, the scales of justice only tipped one way, naturally interfering with the natural rhythm of the electoral process. A clear example is the fact that radio and TV stations omitted advertisements from right-wing parties and normally aired advertisements from left-wing parties; the balance tipped in October. In Brazil, candidates have a transmission quota by law, to avoid distortions. The election took place precisely during this period.

There is mounting evidence that a fake judge @Alexadnre engaged in serious, repeated and deliberate election interference in Brazil's last presidential election. Under Brazilian law, this would mean up to 20 years in prison. (Elon Musk)

In addition to this phrase said by Elon Musk, he guarantees that he has proof that Twitter employees worked with the STF to weigh in on the elections.

In the first year of the current president's inauguration (year 2023) with the same operating mode of

Nicolás Maduro and all modern dictators, there was a real hunt for political competitors and everyone who could one day act against the communist model that began to be implemented in Brazil. Within the four lines of the judiciary, Lula and Moraes began to arrest opponents, impose millionaire fines on opponents and persecute families of opponents, including minor children. If we look at the most advanced dictatorship in Venezuela we can see the same signs and understand what the red future that Brazil will face is.

Everything that Alexandre de Moraes does is outside the rite of the law and forging evidence contrary to his opponents, as he himself will be the one to judge and his word is the one that must be obeyed, it is impossible for an opponent to triumph through democracy in Brazil.

Relatives of Alexandre de Moraes

Even an unscrupulous being who aspires to be a dictator has a family, and it is natural that he is a human being, or he should. So in this topic, the main people who are linked to Alexandre de Moraes and who are family members will be listed. The graph below displays the main ones.

Alexandre de Moraes is the son of Leon Lima de Moraes and Gláucia de Almeida Moraes, his father has already passed away (we need a photo of his father's tomb with a beautiful human coconut on top). Alexandre's mother is alive and has a high degree, including a PhD.

Viviane Barci de Moraes is a lawyer graduated from the Faculty of Law of Universidade Paulista (UNIP) and with a degree in Advertising and Marketing from the Faculty of Advertising of Universidade Paulista (UNIP). Coordinating partner at Barci de Moraes, she has 18 cases [16] being processed in the STF of Alexandre de Moraes, her husband.

Giuliana Barci de Moraes (photo below) has a master's degree in Constitutional Law from the Faculty of Law of the University of Coimbra (UC). Lawyer graduated from Universidade Presbiteriana Mackenzie. Lawyer at barcidemoraes.com.br.

Alexandre Barci de Moraes holds a master's degree in Administrative Law from the Faculty of Law of the University of São Paulo (USP), Faculty of Law Largo de São Francisco. Lawyer graduated from the Faculty of Law of the University of São Paulo (USP) – Faculty of Law of Largo de São Francisco. He is a Lawyer at barcidemoraes.com.br.

Gabriela Barci de Moraes is the only daughter who follows a different pattern from the others, the relationship she has with the family business was only located in a partnership in a company Lex - Instituto de Estudos Jurídicas LTDA of the Barsi family.

Lex - Instituto de Estudos Jurídicas LTDA The company Lex - Instituto De Estudos Jurídicas Ltda, whose corporate name is Lex - Instituto De Estudos Jurídicas Ltda, was founded on 06/01/2000 and is registered with Solutudo in the Training segment with CNPJ 03.850. 784/0001-35. In the market, the company is located at Rua Campos Bicudo, Nº 98 - Floor 9 Conj 1 Room 3 in the Jardim Europa neighborhood in São Paulo - SP, CEP 04536-010. The company Lex - Instituto De Estudos Jurídicas Ltda is registered with the Federal Revenue under CNAE 8599-6/04 with the main activity of Training in Professional and Management Development. Board of Partners and Administrators:

- VIVIANE BARCI DE MORAES
 - Entry date: 06/01/2000
